

Sample Submitted Project Video Transcription

Scott Rager speaking:

Here at the bottom of the page you see a short list of Continuous Improvement Projects that have been submitted to the Portal so far.

Let's take a look at one of them.

As you can see this project is entitled, "Business Outreach Committee Development". The Project Lead was Jennifer Feaman. If you would like to see which AQIP category this project addresses you will see it here. It is AQIP Category 2. What is AQIP Category 2? Refer to this navigation button. You can see the Category 2 means "Meeting Students and Other Stakeholder Needs." You don't have to determine which AQIP Category your project may address. The AQIP Coordinating Committee will do that for you.

So... these are the questions that Jennifer answered in submitting her project. First of all you want to tell you're Desired Outcomes. The question is to briefly describe your proposed project or process improvement and your described outcome in less than 150 words. Then you are to give your measures of success. The next asks you to describe why your project is needed. What led you to believe the improvement was needed and why your project is high among your Department's, Division's, or Institution's current priorities? Who is involved with your project? Who else might be affected by your project? The Resources your project might need. Those are the simple questions you are asked to submit a portal project.
